I didn't have any information about the game when I started playing.

I knew from the start up that it's going to be a small game, but for what resources the creators of this game had it is a pretty good game.

When I noticed you attack and shield with "kinda" motion controls I first thought: "Oh I'm so gonna rage about the controls in this." but it actually turned out that the motion controls were really well made! (Well ok there was one or 2 times the attacks didn't go where I wanted them to but it wasn't much of a deal.

Basically it's a small and short game that got executed pretty well.

Definitely worth picking up when you search for a small good game.. This game was absolutely charming, ignore the spoiled haters.

It has a lot of problems....mediocre graphics, no sound controls, only resolution changing for graphics, bit awkward controls, and "meh" in terms of story.

But the music was cool and so was the flying around....even if it was a bit on rails it felt good playing it.

It earned its 5 bucks from me, I recommend checking it out or sending it to a friend as a stocking stuffer esque game. If you have a young kid it would make a great game to play with them.

If you can't spend a couple dollars and enjoy the flight...then you are too young to appreciate unique experiences and oddball games. You would be better off handing EA 60 bucks for 4 maps. =P. Very nice art and music. The gameplay, however, is barely there. There are two modes. First one is "exploration" of tiny maps by flying over them, looking for gems, story pies and level entrances. Second one is a clunky rail shooter, except without shooting: you avoid projectiles and other dangers (never sure where to go or even what might hit you), and once in a blue moon get to cast one of two spells. Both moving and casting (done with gestures) feels very unresponsive: it's an experience of dragging a spoon through thick jelly, not flying on bird's wings. This game belongs on tablets, where controlling a bird and casting spells with your finger rather than a mouse, might add an additional level of "wow". On PC it's a waste of time and money.. This game won't change your \u2665\u2665\u2665\u2665 in life or anything but it's very unique and worth the brief play through I mean\u2665\u2665\u2665\u2665\u2665\u2665it's 5 bucks stop being a Jew and just check it out.. At least the splash screen looks cool.

This is a game where you play as a crow. As the only game with this feature, there is some reason to play it.

This game is worth about three dollars. It's a little different, and a little fun.. First Look:

[Review to come!](#)

[I really liked this game. very atmospheric. I haven't gotten very far in the game proper but it's already worth it! The music and style, combined with the original concepts, make this a game to seriously consider!. So what's the game about? You're a crow, naturally, flying around, collecting V discovering things while upgrading your abilities until you're ready to take on "bosses"... then you decide if you're a good crow or EEEEEEEEEEEVIL crow by cursing the beaten boss!](#)

[Crow ain't too bad and a welcome change of pace after a few hours into Alien: Isolation, to say the least!](#)

[It is originally a Mobile game that got ported to PC and I'd say the porting to PC ain't too shabby. For a mobile game, its fun and it has decent music to keep you engaged in the game. The downside is... that game is very short and once you do finish it, no replay value at all.](#)

[All in all, I usually stay away from Mobile ports but I'd say this one is actually a decent game to give a shot someday! The soundtrack alone is worth the purchase since it is included freely with the game!](#)

[PROS:](#)

+Soundtrack is good and freely included with the game.

+Soothing gameplay.

+Interesting story for a mobile game!

+Atmospheric visuals.

CONS:

-Game designed as a mobile game so the controls aren't always very responsive.

-Very short and no replay value at all.

-Besides screen resolution, no other options to fiddle around the settings (might change later).

RECOMMENDATION:

If you seek a "soothing" gameplay when playing other stressful games, Crow is your medecine! Just, don't expect this game to last for long since once you're done with the game, its over! The devs mentioned about future controller support and achievements implementation so for those who care, there... you have it!

RATING:

7.5 V 10

Cool if you wanna kill time and you have absolutley nothing to do, but otherwise it's a game on rails with no real choices, pretty boring A-B stuff, wouldnt pay money a second time.. It wasn't very good.. Wow... Just wow. I was debating with this game for a long time. I still don't know exactly if it was worth it.

Pros:

It has a great story to it and the gameplay is simplistic, but not in a bad way. It really hooks you and make you want to play more. The game is extremely responsive and it's obvious that it was given its time in development before it was released to the public. The soundtrack really is beautiful and comes with the game's purchase along with development and marketing images.

Cons:

EXTREMELY SHORT! It is not worth the \$5 price tag because of this. Get it on sale! There is only 4 levels and even with the challenge modes it with only take about an hour to finish the entire thing. I REALLY, REALY, REALLY want there to be more to this game! It has so much potential!. Its a very cool game and all that stuff, but i do not think it is worth 10 euros. I think that is way too much. Since the game is short, and nothing really new happens in it. It is basically the same you have to do, over and over again. But besides that, the music and atmosphere in the game is quite amasing.. THE BEST GAME EVER!!! and yea lol i found this game cause its to do with a crow ffs. Its super fun and todally my game if u know what i mean (read edgy S**t about Suncrow in my profile if u wanna know). The crow kills and protects things from evil, thats Suncrows job too! they should call it like SUNCROW THE GAME xD but no one but my family and friends know about suncrow.

- Simplistic (e.g. bad) phone port
- I guess it would more fun on tablet as a casual game (20 min in and I am already bored)
- Sound issues (muted parts during "story-telling")
- MANY loading screens
- Loading screen freezing

...I was really hoping for something different.... If you really wanna be a bird sure go for it.

If you like dogs more or are looking for a higher resolution expereance either don't go for it or wait for a sale.

Progress on Abducted (our other game):

Both Crow and Abducted are on sale this week and Abducted has been getting a ton of great updates as it moves into the Unreal engine. Check out the new gameplay and improvements in these development videos:
