After nearly an hour of discussion, your team has a plan and you each have a set of tasks to prepare in the coming weeks.

As you head back to Dome B9, you run through what you need to do in the next few weeks. Your cover job at the Mars Bar has you working full-time hours, and you aren't going to be up to cracking a vault open if you're overextended, so your available time is going to be limited. You'll need to prioritize.

- I'd better focus on the casino plans and getting information about the vault.
- I want to find out more about this Mars Consortium.
- Working at the bar is pretty decent. I'll put in my shifts and keep my head down.

## About This Game

Rob the first Martian casino and find out who really rules the planet! Crack a safe, break some hearts, start a revolution, or get rich beyond the stars!

*The Martian Job* is a 155,000-word interactive novel by M. Darusha Wehm. It's entirely text-based, without graphics or sound effects, and fueled by the vast, unstoppable power of your imagination.

Welcome to Mars, where one last safecracking job could nab you enough platinum to last a lifetime. But how will you pull off your heist? Do you hack into the vault, blast your way in, or finesse the locks? Can you trust your misfit team of grifters and con artists? Can they trust you?

Succeed in your mission and win power, love, and money—or fail and spend the rest of your life tending bar on another planet. Pay enough attention, and you'll learn about the corrupt Martian government as you go—along with the rebels who oppose it and the corporation trying to take it over. Will you choose to save the planet's troubled colonists, or use the information for your own gain? You'll also encounter opportunities to avenge an old comrade, thwart the machinations of a power-hungry tycoon, or start a revolution. Decide where your loyalty lies: with your team, with Mars, or only with yourself.

Can you shape the destiny of humanity's first interplanetary colony—and walk away with a trunk full of platinum?

You dance together for another couple of songs, then Indigo jerks their head to the edge of the dance floor. You follow and grab a bottle from the water station.

You take a long swig from the bottle then pass it over to Indigo. They look down at you with a cocked eyebrow, reaching for the bottle, their fingers brushing yours, then take a long, slow drink.

"We should do this again sometime," they say, leaning in closer than necessary to be heard.

"You've got some really great moves."

- I liked it when Indigo and I were flirting, but I don't want things to go beyond that.
- I've had a really good time. I'd like to see Indigo again and see how I feel about them then.
- Indigo is great and life is short. I'd like to get something started with them.

It's not usually that busy at this time of day but the bar is jumping now. Marvin is behind the stick, putting his dancer's stamina to use filling orders. He catches your eye and you see a silent plea. You do hear a lot of things behind the bar, so you slip under the hatch and grab a towel.

"Thanks, Jamie," Marvin says. "It's off the hook in here today."

"Must be because of that business yesterday," you say as you fill highball glasses with ice and mix cocktails. "The Resistance sure made a statement with that." You take a step closer to Marvin and lower your voice.

"I think this is exactly the kind of statement the Resistance needs to make if it wants to be taken seriously."

"I told you I don't have anything to do with the Resistance," he says.

- "Well, you should. Even I can see that things need changing around here."
- "I believe you. But I do want to help and you know I'm sincere. You know people; you could put in a good word for me."
- "Just hear me out. I can convince you I'm trustworthy."

The safe is one of the smaller models designed for keeping documents, jewels, or cash. You know the platinum is kept elsewhere so this is only the first step toward getting your payday.

It occurs to you that there might be a more expedient way of making a big score. You suspect Jacoby would pay handsomely if someone happened to tip him off to this heist and he picks us up before we can get the next stash.

- I want to get on Jacoby's good side anyway. That's worth double-crossing the team.
- I wanted an in with Jacoby, but I'm not sacrificing the team for that. I'll stick with the plan.
- Jacoby's pockets are deeper than even the stores of platinum on Mars. A chance for a bigger payday is worth double-crossing the team.
- The thought of more money is definitely appealing, but not enough to betray the team. I'll carry on as planned.

Definitely the worst Choice of Games game I had the misfortune to play\read yet, and I've experienced many of them. The plot is paper thin, the choices don't matter because you always succeed no matter what or other characters will tell you 'no' and decide for you, the characters are dull as dishwater, and I even saw a few grammatical errors. How this was nominated for a Nebula award, I will never understand.. The Martian Job is exactly what I thought it would be. It can be a sort of "Ocean's Eleven on Mars" type of story, or it can be "expose corporate corruption sci-fi style" story depending on your choices. One reviewer complained that the story switches gears from one to the other in the middle. It really does not. If you want to keep the plots from mixing, you have to simply be consistent in choosing the options that stick to the path you choose to play through the story. It is true the "corporate corruption" story line is offered later in the story, but once you switch, consistently choose the new path from then on will give you a satisfying plot to follow. Add in the various romance options and you have good replayability for a cheap price. Since I have always liked the "professional gentleman thief" type characters, "The Martian Job" is a solid buy for a surprisingly compact story.
